

Sanger Heart & Vascular Institute Presents:
The Dowd Foundation Center
Cardio-Oncology Symposium

Saturday, October 12, 2024 | 8:30am - 4:00pm

Sanger Heart & Vascular Institute - 1237 Harding Place, Charlotte NC

As the landscape of cancer therapeutics rapidly evolves, overall cancer survival is improving at an unprecedented pace. However, patients are now living long enough for cardiovascular complications to emerge as an alternate cause of morbidity and mortality. In addition, life-saving cancer treatments such as chemotherapy, radiation therapy, and targeted therapy, may be stopped prematurely due to adverse effects on the cardiovascular system. This has led to the rapid expansion of cardio-oncology, a collaborative field that strives to maximize the benefit of cancer treatments while minimizing cardiotoxicity to improve outcomes and quality of life in cancer patients with cardiovascular disease.

Join us in person or virtually for a clinically oriented symposium focusing on challenging cases in cardio-oncology. This will be a case-based, "beyond the basics" curriculum focusing on the difficult clinical dilemmas that arise in the care of this complex patient population, with an emphasis on the concept of permissive cardiotoxicity. The symposium will feature case presentations, interdisciplinary panel discussions, and interactive Q&A's with experts in the field of cardio-oncology, and will cover high-yield topics such as amyloidosis, immunotherapy, and cardiac critical care while also providing opportunities for networking and collaboration among participants. This conference is designed for all healthcare professionals that are involved in the care of cardio-oncology patients or have an interest in the field.

Atrium Health
Sanger Heart & Vascular Institute

In collaboration with Atrium Health Levine Cancer

AGENDA

8:00 AM	-	8:30 AM	Registration & Breakfast
8:30 AM	-	8:45 AM	Opening Remarks
8:45 AM	-	9:45 AM	Session #1: Prevention of Cardiac Events After Cardiotoxic Treatments - <i>More Than An Ounce</i>
9:45 AM	-	10:45 AM	Session #2: Cardiac Optimization Prior to CAR-T and Stem Cell Transplant - <i>Moving Beyond Ejection Fraction</i>
10:45 AM	-	11:00 AM	Break
11:00 AM	-	12:00 PM	Session #3: Permissive Cardiotoxicity in Breast Cancer Therapies - <i>Straining for Clarity</i>
12:00 PM	-	12:30 PM	Lunch
12:30 PM	-	1:30 PM	Session #4: Complex Cases of Immunotherapy Cardiotoxicity - <i>When Seeing Is Not Believing</i>
1:30 PM	-	2:30 PM	Session #5: Cardiac Considerations in Chronic Targeted Therapies - <i>Hindsight Is 50/50</i>
2:30 PM	-	2:45 PM	Break
2:45 PM	-	3:45 PM	Session #6: Cardiac Amyloidosis 201 - <i>Not for the Faint of Heart</i>
3:45 PM	-	4:00 PM	Closing Remarks

FACULTY

Jennifer Atlas, MD | Atrium Health Levine Cancer
Nyal Borges, MD | Sanger Heart & Vascular Institute
Robert Copeland-Halperin, MD | Northwell Health
Roberta Florido, MD, MHS | University of Utah
Nilanjan Ghosh, MD, PhD | Atrium Health Levine Cancer
Arielle Heeke, MD | Atrium Health Levine Cancer
Bradley LeNoir, MD | Sanger Heart & Vascular Institute
Joseph Mishkin, MD | Sanger Heart & Vascular Institute
Satish Misra, MD | Sanger Heart & Vascular Institute
Nicolas Palaskas, MD, PhD | MD Anderson Cancer Center
Amar Parikh, MD | Sanger Heart & Vascular Institute
Sunil Pauwaa, MD | Advocate Christ Medical Center
Brittany Ragon, MD | Atrium Health Levine Cancer
Omar Siddiqi, MD | Boston University Amyloid Center
Jai Singh, MD | Sanger Heart & Vascular Institute
Cindy Varga, MD | Atrium Health Levine Cancer
Sujethra Vasu, MD | Atrium Health Wake Forest Baptist
Eric Yang, MD | University of California, Los Angeles
